

A solvent / degreaser.

Reserved for professional use.

DESCRIPTION & APPLICATIONS

Cleaning mechanical parts, industrial surfaces and equipment. Ready-to-use
Use in tank, or apply by cloth or brush

IGOSOLVE 105 S is a degreasing agent designed for degreasing operations requiring high safety constraints, and the use of a solvent with a high flash point.

This fluid also features the advantage of being odourless.

IGOSOLVE 105 S possesses a vapour pressure of less than 0.01 kPa at 20°C, and so is not affected by VOC regulations or the French ruling of 30 April 2002.

By virtue of its performances and lack of odour, IGOSOLVE 105 S is more particularly aimed at degreasing or pressure cleaning operations on the express condition that the equipment used is completely suited to this use (check before implementing).

IGOSOLVE 105 S is recommended for cleaning or degreasing parts of all sizes.

ADVANTAGES

- Low volatility (non-VOC)
- High solvent power
- No corrosive action on the usual metals.

Characteristics	Standards	Units	Values
Appearance / Colour	-	-	Colourless fluid
Density at 15°C	NFT 60-101	kg/m ³	760-860
COC flash point	NFT 60-118	°C	>100

The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.
