

**A new-generation high-performance additive usable for treating fuel in any petrol engine vehicle.**

### ADVANTAGES

Regular use of ACTIVessence ensures the following:

- Reduced fuel consumption
- Cylinder tops lubricated
- Clean intake systems
- Combustion chambers in perfect condition
- No deposits promoting valve or segment sticking
- Reduced pollutant emissions
- Optimum ignition

ACTIVessence prevents clogging of the engine and EGR valve.

### USES

ACTIVessence is usable on any type of petrol engine: naturally aspirated, equipped with a turbocharger, with or without catalytic converter.

ACTIVessence is a preventive and curative product.

ACTIVessence comes in a single-dose bottle, for use as a fuel top-up treatment. This operation should be repeated every 2000 km.

An overdose of ACTIVessence has no adverse effects on engine operation. A dose of ACTIVessence can treat a vehicle possessing a lower capacity tank.

Advice: two treatments with ACTIVessence are recommended for one oil change interval.

*The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.*
