

**An aerosol for repairing and reinflating tyres with or without inner tubes (tubeless).
Reserved for professional use.**

USES

Repairs and instantly reinflates tyres with inner tubes or tubeless tyres, without any removal or tools.

Suitable for tyres on cars, motorbikes, scooters, trailers or caravans, etc.

Remember that the spare wheel compartment has been replaced by an LPG tank.

Does not damage the tyre or inner tube, thanks to the latex base used in this product.

The impact-resistant aluminium box is super-compressed, and can fully re-inflate any type of car or motorbike tyres (for 4x4s, it is better to have 2 cans).

INSTRUCTIONS FOR USE

If possible, remove the object which caused the puncture.

Position the tyre valve upward.

Fully deflate the tyre.

Shake the box vigorously.

In cold weather, warm it up in your hands or near the vehicle's heating vents.

Screw the IGOL ANTI CREVAISON connector onto the valve.

Remove the protective cap.

Position the box with the head downward.

Press the button until the tyre is fully re-inflated.

Immediately drive at moderate speed, approx. 15 km, to distribute the product properly.

As soon as possible, check the tyre pressure and adjust it if necessary.

Although it is possible to drive for hundreds of kilometres, this repair must be considered provisional, before making a permanent repair by conventional means at your convenience.

Inflammable propellant gas: Do not spray onto a flame or heat source.

Read the precautions for use on the box carefully.

Do not use the product for any purpose other than that for which it was intended.

PACKAGING

Box of 6 x 300 ml aerosol cans

The aerosol cans must be used within one year of delivery for optimum use; returns will not be accepted after this time.

The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.
