

Lubricates, unseizes and facilitates dismantling. Reserved for professional use.

DESCRIPTION

DEGRIP AL comprises lubricating, anti-seizing, anti-corrosion and water resistant agents. It possesses high wetting and penetrating power thanks to its low surface tension. It unseizes, drives out moisture and protects against corrosion. All the components of this aerosol formulation have been approved by the American body NSF for incidental food contact.

Physico-chemical characteristics of active ingredient:

- Appearance: slightly yellow clear liquid
- Specific gravity: 0.78
- Flash point > 56°C
- Pour point: - 30°C
- Net volume: 97% active ingredient
- Insoluble in water
- Non-inflammable propellant gas

USES

This unseizing agent is particularly recommended for unseizing mechanisms jammed by corrosion in food environments (hot, wet, corrosive atmospheres, etc.). It can be used across the agri-business sectors, in canneries, industrial bakeries, abattoirs, processing factories, etc. It facilitates dismantling thanks to its rapid wetting and penetrating power.

INSTRUCTIONS FOR USE

- Shake the aerosol can vigorously before use.
- Spray at 20 cm from the surfaces to be treated.
- Leave to act for a few moments, and dismantle seized parts.
- Repeat the operation for heavily corroded parts.
- Works in all positions, and its extension tube also enables it to reach hard-to-access spots.

PACKAGING

- Box of 6 aerosol cans
- Nominal capacity: 650 ml -- Net volume: 400 ml
- Propellant gas: CO2

The aerosol cans must be used within one year of delivery for optimum use; returns will not be accepted after this time.

Characteristics are given for information only and correspond with our manufacturing standards. IGOL reserves the right to modify them to provide its customers with the benefits of technical progress. Before using this product read the instructions for use and the environmental impacts mentioned in the technical and safety data sheets. The information given above is based on the current level of knowledge relative to the product concerned. The product user should take all useful precautions relative to its use. IGOL can in no circumstances be held responsible for damage resulting from incorrect use.
