

**Enables petrol or diesel engines to start in any weather.  
Reserved for professional use.**

## USES

IGOL DÉMARRAGE MOTEUR facilitates starting. Thanks to its lubricating properties, it prevents all the risks of engine seizing: its speed of treatment prevents the battery from draining. It can be used on any engine: cars, lorries, boats, motorbikes, lawnmowers, outboard, karts, agricultural and construction machinery.

## INSTRUCTIONS FOR USE

### **Use in a ventilated space.**

Shake well before use.

Spray for a few seconds at the air filter inlet, and activate the starter.

### **Petrol engine:**

Activate the starter and accelerate gently.

### **Diesel engine:**

Start in the idling position without using the spark plugs or preheaters. In very cold weather, keep spraying for a few seconds after the engine has started.

Inflammable propellant gas: do not spray onto a flame or heat source.

Do not use on a live electrical circuit.

Read the precautions for use on the box carefully.

Do not use the product for any purpose other than that for which it was intended.

## PACKAGING

Box of 6 x 400 ml aerosol cans

**The aerosol cans must be used within one year of delivery for optimum use; returns will not be accepted after this time.**

*The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.*
