

Mineral oil specially developed for outboard engine propeller boxes.

ADVANTAGES

- Prevents the premature wearing of the gears.
- Prevents chattering during operation.
- Leaves a protective deposit.
- Excellent anti-corrosion, anti-rust and anti-wear properties.
- Retains its qualities throughout winter storage.
- Retains its qualities in a salty environment.

USES

EMBASE NOIRE is the reference product for ensuring the longevity of the gears located in the base of outboard engines.

Its reinforced formula and anti-corrosion properties ensure that a protective layer is maintained over all of the gears and moving parts.

EMBASE NOIRE is designed for intensive use.

Perfectly suitable for all outboard engines, whether old or new generation.

Characteristics	Standards	Units	Values
Viscosity at 40°C	NF T 60-100	mm ² /s	160
Viscosity at 100°C	NF T 60-100	mm ² /s	19
Viscosity Index	NF T 60-136		134
Pour point	NF T 60-105	°C	-27
Flash point	NF T 60-118	°C	240

Characteristics are given for information only and correspond with our manufacturing standards. IGOL reserves the right to modify them to provide its customers with the benefits of technical progress. Before using this product read the instructions for use and the environmental impacts mentioned in the technical and safety data sheets. The information given above is based on the current level of knowledge relative to the product concerned. The product user should take all useful precautions relative to its use. IGOL can in no circumstances be held responsible for damage resulting from incorrect use.
