

LAVE-GLACES ÉTÉ is a ready-to-use wash fluid aimed at cleaning motor vehicle windows and windscreens.

This product contains synthetic detergents and adjuvants to boost water run-off, thereby improving surface wettability. These properties facilitate soiling removal, thereby contributing to improving road safety.

ADVANTAGES

LAVE-GLACES ÉTÉ contains non-ionic surface active agents: it degreases the windscreen and removes soiling.

It is harmless to windscreen wiper rubber seals and paintwork.

USES

LAVE-GLACES ÉTÉ can be used as-is, without pre-dilution. It can be mixed with another liquid of the same type.

Characteristics	Standards	Units	Values
Density at 20°C	NF T 78-103	g/cm ³	0.998
pH	NF T 78-103	pH unit	7.5
Surface tension	NF T 73-060	- dyne/cm	27

The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.
