

**A powerful water-soluble degreaser, effective at eliminating soiling caused by industrial and urban pollution, as well as road traffic.**

**Reserved for professional use.**

### USES

MULTI NET is particularly tailored to removing organic soiling such as grease and oil residues. The degreasing power will generally be much greater than that obtained with a conventional product, more generally in case of oily soiling also containing carbon black and pigments (pollution due to road traffic), which is eliminated with MULTI NET.

With no inflammability risk or damage risks to plastics, rubbers or paints, it also reduces the degreasing costs thanks to its dilute use.

A water-based degreaser for any equipment and surfaces:

- Construction machinery,
- Agricultural machinery and tools,
- Cleaning vehicles, engines, workshops, showers, basins, tiling and floors,
- Street furniture, etc.

MULTI NET is diluted in water to between 5 and 10%.

MULTI NET can be used for cleaning bodywork or bodywork parts made from ABS. It poses no alteration risks to this type of polymer.

MULTI NET can also be applied to aluminium surfaces. However, the product must not remain in contact with the cleaned surface, which must be carefully rinsed.

### INSTRUCTIONS FOR USE

- Spray cleaning

Dilute MULTI NET to between 5 and 10% in cold water Spray on and leave in contact for 3 to 5 minutes  
Carefully rinse the treated surface before drying, (preferably high-pressure rinse)

- High-pressure machine cleaning

Fill the high-pressure cleaner tank with MULTI NET (5 to 10%) Apply to the surface to be cleaned

Rinse the treated surface carefully before drying.

- Automatic cleaning (car wash)

Use a 5 to 10% mixture of MULTI NET in water

*Never let the surfaces dry before rinsing, and store MULTI NET in a frost-free place, where the temperature is less than 40°C.*

Characteristics	Standards	Units	Values
