

**A cold degreasing agent, for electrical contact.
Reserved for professional use.**

PERFORMANCES

Residue-free
Very short drying time
Wetting power on all surfaces
Highly compatible with most materials

USES

Removes greases, oils and temporary protection products.
Removes all forms of soiling or stains such as mud, glue or adhesive marks, etc.

Examples of use:

Degreasing metal parts, roller bearings, moulds or machined parts.
Cleaning braking components (callipers/discs, etc.) – compatible with elastomers
Cleaning frames, chassis or machine-tool side members
Degreasing electric motors, isolators or switches (**LIVE VOLTAGE LESS than 12,000V**)

NET CONTACT can be used on most materials, including coated, metals, laminates and thermoset plastics.

Inert to metals, it does not cause oxidation on light alloys or copper-based metals.

The aerosol cans must be used within one year of delivery for optimum use; returns will not be accepted after this time.

The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.
