

Maintenance range

DKPAN STRIPPING AGENT

Regenerates surfaces altered by the presence of solid or film-formed tailings. Stripping agent without methylene chloride, without N-methylpyrrolidone and without methanol (does not flow). Effective on a wide variety of paints and coatings. It strips varnishes and lacures removes graffiti and dissolves the majority of adhesives. Plastics processes: dissolves plastic material residues that can make moulds unsuitable for their purpose. Use on materials withstanding attacks from solvents (wood, brick, cement, iron and steel).

500 ml

DÉMARRAGE MOTEUR

SPECIAL FOR POOR ENGINE STARTING

Facilitates quick-start in all weathers for petrol or diesel engines.

Makes for easier engine startup. Prevents all risks of engine seizure: it works quickly to prevent the battery from draining. Can be used on all types of motors.

400 ml

REDUCTOL 8 GENERAL PURPOSE, HIGH-PERFORMANCE ANTI-SEIZE UP LUBRICANT

Facilitates disassembly - Unjams - De-rusts - Lubricates - Anti-corrosion - Anti-moisture - Phosphating agent.

Reductol 8 is a multi-purpose penetrating oil. It reduces rust and descales transmission components, making them easier to disassemble. Its special formula includes excellent descaling and cleaning agents, which means it can be handy for all types of maintenance work.

500 ml

DEGRIP AL ANTI-SEIZE UP AGENT FOR THE FOOD INDUSTRY

Multipurpose, high-performance release agent. It lubricates, loosens and facilitates disassembly work. Cleaning and humidity resistant properties. Protects parts from corrosion. Specially designed for use in the food industry.

400 ml

ANTI CREVAISON TIRE RESTORER

Offers on-hand assistance by instantly re-inflating both regular and tubeless tires. Repairs and instantly inflates tyres with inner tube or tubeless tyres, with no tools or disassembly required. Suitable for tyres on cars, motorcycles, scooters, trailers, caravans, etc. Can be used to re-inflate all types of car and motorcycle tyres (2 cans recommended for 4x4s).

300 ml

OIL CUT TP 150 + LUBRICANT FOR DRILLING AND TAPPING

Facilitates drilling and tapping operations on all metals. Increases the performances and life expectancy of tools and machinery. With its high-pressure capabilities, can be used: - On ferrous and non-ferrous metals. - For any difficult operation (drilling, tapping, threading, boring). - For all types of activities

400 ml

THERMO CONTACT

ELECTRO-CONDUCTIVE,
ANTI-BLOCKING ASSEMBLY PASTE

Avoids corrosion and thermal rust. Protects against seize-up. Lubricates at high temperatures

Anti-seize paste made with aluminium complex soap, specially designed to prevent seizing and corrosion. Makes it possible to easily assemble and disassemble parts subject to chemical or thermal treatment. Thermocontact makes for better electrical contact. Lubrication from -30°C to +600°C.

400 ml

FILTER CROSS PRODUCT FOR MOTOCROSS AIR FILTERS

Holds back dusts efficiently and protects the engine from abrasive wear. Highly adhesive lubricant spray for foam filter components.

500 ml

SOUDNET ANTI-ADHESIVE WELDING AGENT

Protects nozzles. Prevents welding spatter from adhering. Silicon-free. Paint can be applied following use. Protects areas around welding. Chemically and thermally stable.

400 ml

DEGRIPPANT LUBRIFIANT

GENERAL PURPOSE PRODUCT

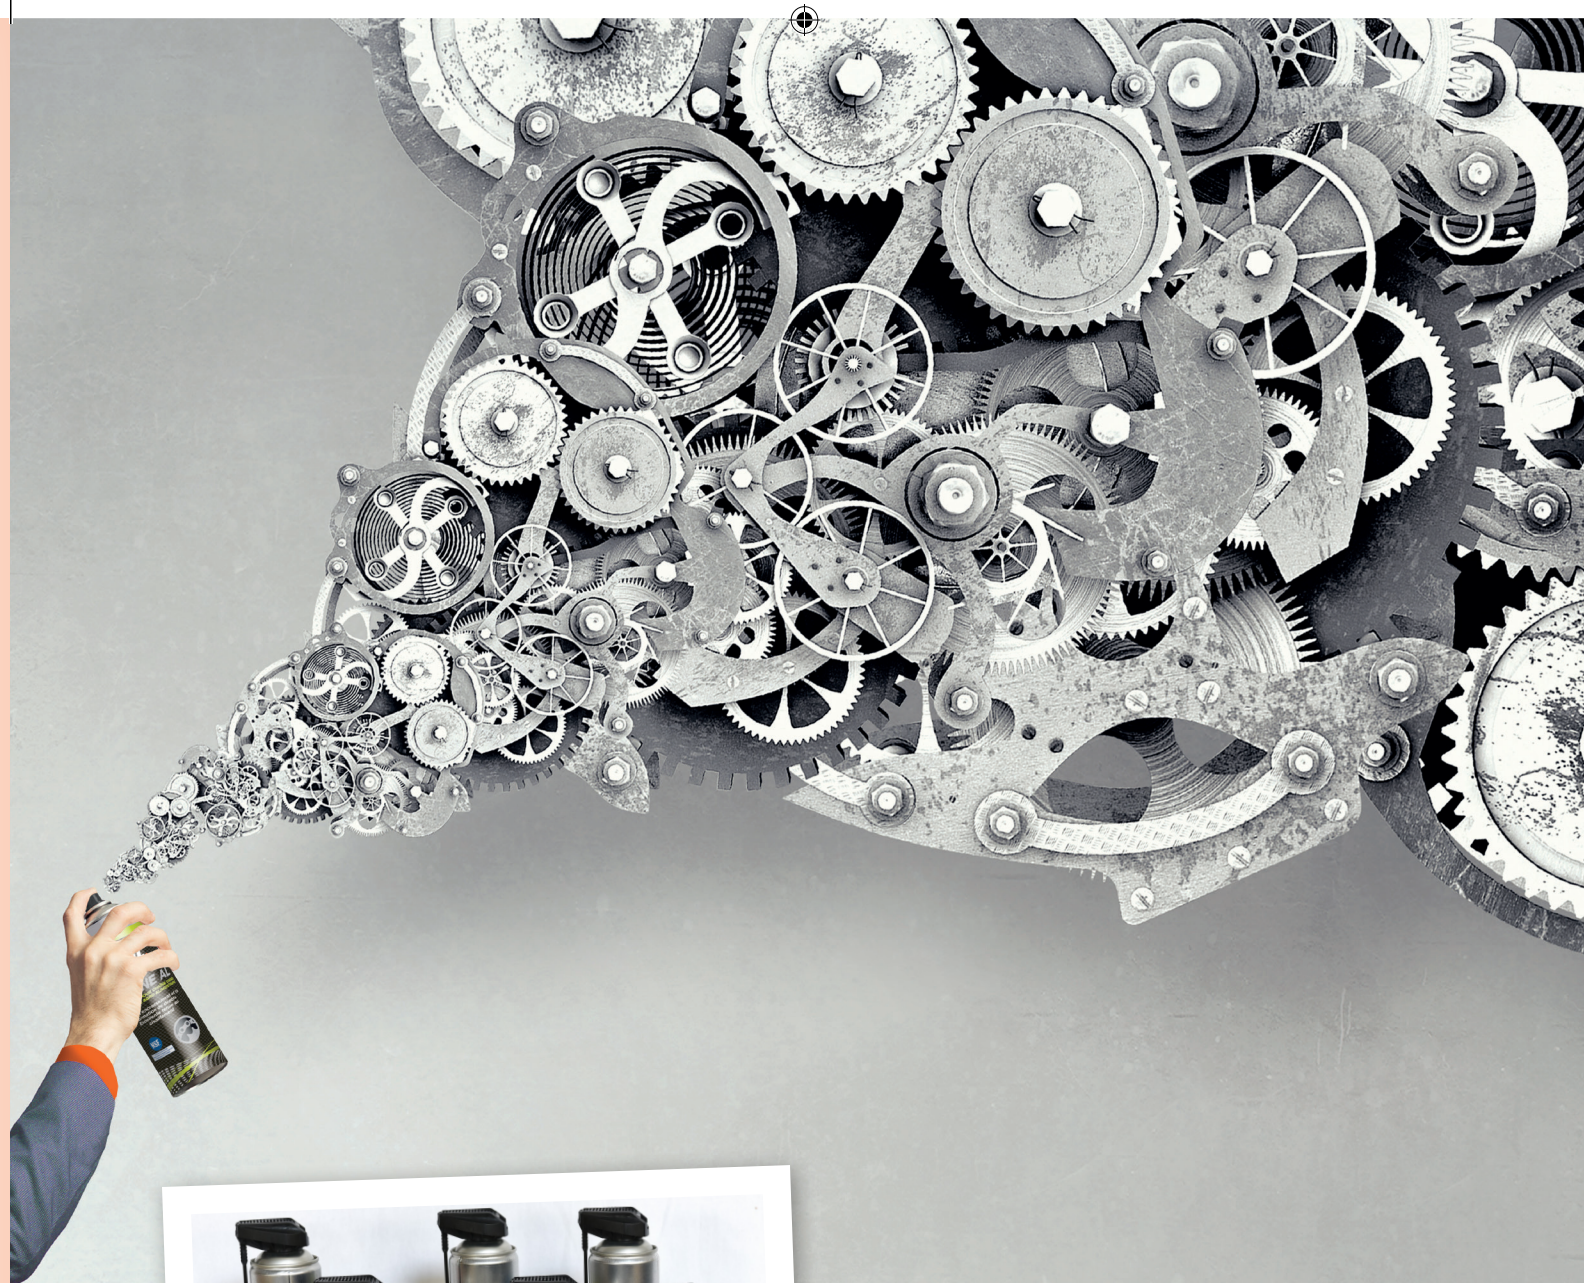

High-performance, anti-corrosive release agent and lubricant

Anti-seizing, lubrication and corrosion protection for all mechanisms and metal parts. Water and humidity resistant. Leaves a grease film that lubricates, protects and is very effective against corrosion.

Suitable for long-term storage of metal parts. Reduces the coefficient of friction between the moving parts and the brackets. It dissolves greases and tars. This penetrating oil can be used in the following fields: industrial, public works, farm machinery, etc.

500 ml

RANGE OF AEROSOLS

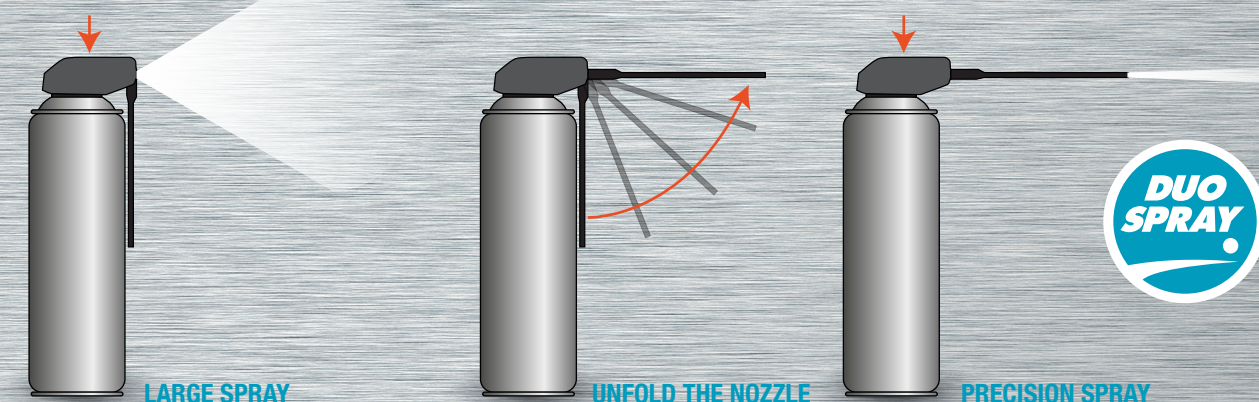

AEROSOLS... WHO ARE THEY FOR, AND WHY... ?

Range of aerosols designed to meet every requirement.

All the products in this line have been researched and developed by IGOL, and comply with the strictest standards with respect to safety and the environment. This range of 35 products offers a tailored solution for every type of complex and demanding operating environment. Each business sector has its own set of products.

For even greater ease of use and effectiveness, try out the DUO-SPRAY IGOL nozzle. This new spraying development for IGOL aerosols ensures that the IGOL products you have chosen are used under the best possible conditions. The two spraying positions offered by the DUO-SPRAY nozzle give you both efficient control and precision when using the products delivered in aerosol form.

DISCOVER OUR NEW NOZZLES DUO-SPRAY

Grease removal range

R44 GENERAL PURPOSE DE-GREASER

General purpose grease remover, cleanser and descaler. General mechanics and automotive. Cleans and degreases mechanical parts, brake pads and shoes, clutch components, and contacts for distributors and electrical terminals. Dissolves any deposits from resin, oil, grease, wax or brake fluids.

500 ml

NET FREINS GREASE REMOVAL PRODUCT

Special for braking and clutch systems. Removes brake fluid, grease, oil, dust and all other

residue from metal parts. Restores adherence to disc seals on the engine flywheel clutch system. Enables the brake system to function correctly. Makes noises disappear. Leaves no residue.

500 ml

NET CONTACT ELECTRICAL CONTACTS DE-GREASER

Leaves no residual deposits. Very short drying time. Compatible with most materials.

Degreasing of metal parts, bearings, moulds, machined parts. Cleaning of brake components (calipers/discs, etc.) - elastomer-compatible. Cleaning of mountings, frames, beams on machine tools. Degreasing of electric motors, fuses, circuit breakers (AT VOLTAGE LESS THAN 12000V). Can be used on most materials, including coated metals, laminates and thermoset plastics. Inert with respect to metals: does not cause oxidation on light alloys or metal components containing copper.

300 ml

IGOSOLVE AL GREASE REMOVAL FOR THE FOOD INDUSTRY

Colorless. Odorless. Specially designed for degreasing mechanical parts in the food industry. Complies with FDA 21 CFR 178.3530 requirements.

500 ml

Greasing & lubricating range

SILGLISS SILICON GLIDANT

Ensures a long-lasting lubrication. Water-proofs and facilitates gliding. Synthetic, clean lubricant for all types of mechanisms. Glidant for industrial applications (belts, shrinkwrap, Staken) - Helps with thermoplastic mould release - Lubrication for paper cutter platforms and blades (printing). Can be used for temporary protection through application of anti-rust film (for small steel composite parts).

400 ml

SILGLISS AL GLIDING AGENT FOR THE FOOD INDUSTRY

Ensures a long-lasting lubrication. Waterproofs and facilitates sliding. A clean synthetic lubricant for all mechanisms in the food industry. Silicone-based glidant. For all delicate greasing operations.

400 ml

LUBAL LUBRICANT FOR THE FOOD INDUSTRY

General lubrication of machinery on lightweight service in the food industry. Lubrication of mechanisms. Moving and hinged parts. Lubrication for packaging lines. Lubrication of food industry equipment.

400 ml

GREASE GRW MULTI-PURPOSE GREASE FOR THE FOOD INDUSTRY

Highly adhesive. Heavy loads. Totally insoluble in water or steam. Bearings and slide bearings subject to vibrations and repeated impacts. Hinged mechanisms and chains working in extremely humid environments. Rails and cams. Geared mechanisms, both exposed and in casings. Mould ejectors. Highly adhesive on metal parts. Highly resistant to heavy loads. Totally insoluble in water and steam. Operating temperature -20 to +140°C. It is very resistant to oxidation.

500 ml

SUPER VOLCAN EP ADHESIVE LUBRICANT FOR CABLES AND GEARS

Extreme pressure adhesive lubricant. Recommended for the lubrication of cables and exposed gears. Highly-adhesive lubricant for all types of lubrication on exposed or external mechanisms, etc.

600 ml

PATE AS 450 MOS, MOLYBDENUM DISULPHIDE BASED LUBRICANT

Heavy pressures. High temperatures. Synthetic lubricant with high molybdenum disulphide content (over 50%). Resistant to high temperatures (up to +165°C with grease lubrication and +400°C with dry lubrication) and high pressure. Lubrication for guides, rails, gears and valves. Strip-free liner fitting. Run-ins with no scratching or seizing. Metal forming. Cutting tool treatment. Operating temperature: -30 to +400°C.

500 ml

VEGELUB VEGETABLE-BASED LUBRICANT FOR PRECISION LUBRICATION

Does not corrode paint, displaces water and fights moisture thanks to its hydrophobic action. Non-mineral oil-based lubricant specially designed for small equipment and transmission systems. Drip-free for clean, precise work. Chlorine and silicon free. Highly recommended for work with ecological constraints.

500 ml

SHP 50+ MULTI-PURPOSE GREASE

Exceptionally water-resistant (equipment put to work in water, mud, or adverse weather conditions). For the general lubrication of machinery, tools, ball or roller bearings. Highly-adhesive on metals (lubrication required less frequently). High mechanical stability. Exceptional

shearing strength. Total insolubility in water (boiling water and steam), enabling lubrication of equipment working in water, mud and inclement weather. Excellent corrosion and rust resistance. Excellent high-pressure capabilities. Operating temperature: -20 to +140°C.

500 ml

VISCOCHAIINE PRO HIGH-TACK CHAIN OIL

Viscous, highly adhesive synthetic product. Exceptionally water-resistant. Highly adhesive, oil-based lubricant specially developed for lubrication of all types of chains (conveyors, motorcycles, bicycles, etc.) as well as cables and exposed gears. Reduces friction, increases service life of the chain and protects it from rust. Water resistant, reduces noise made by chain. Operating temperature -20 to 145°C.

This lubricant does not contain silicon or any element that is not compatible with USDA H2 requirements.

500 ml

GELFLON PTFE-CHARGED WHITE GREASE

To be used in a damp environment. Charged with PTFE. Use between -20°C and +180°C. Codex mineral oil, in gel format for use in humid environments. With PTFE additive (polytetrafluoroethylene). Workshops, kitchens, bathrooms, all technical equipment rooms. Recommended for plumbing, mechanical, automobile and cycle applications. Can be used whenever a clean lubricant is needed. Can be eliminated with organic solvents.

400 ml

CHAIINE AL BELT AND LINE LUBRICANT FOR THE FOOD INDUSTRY

Avoids fouling and the formation of deposits. Excellent shear stability. Particularly suitable for lubrication of chains on conveyors, ball bearings, roller bearings, moving hook systems used in the food industry, such as slaughterhouses, meat industries, canning plants, bakeries, etc.

500 ml

PROPULS VISCOCHAIN

Specially designed to lubricate all motorcycle chains. Oil-based lubricant, specially designed adhesive for greasing all chains on on- or off-road motorcycles, with or without O-rings, in extreme operating conditions. Reduces friction, increases service life of the chain, is water-resistant and protects against rust. Contains solvent to eliminate deposits and provide good penetration in rods and pins.

500 ml

FLUOX HT Fluorinated lubricant

High performance. High Temperature. Ensure a high clean lubrication between -35°C to +270°C. Withstand the effects of shearing and impacts, saline and wet atmospheres. It is inert to oxygen. Silicone-free. Insoluble in petroleum solvents. Long lasting lubrication.

250 ml

R CHAINE SYNTHETIC LUBRICANT

Ensure a long lasting lubrication. Clean lubricant. Temperature range -40°C to +210°C. Synthetic aerosol fluid aimed at lubricating chains and conveyors working. Ensure a long lasting lubrication for devices in motion. Antwear, extreme pressure. High thermal stability, and causes no deposits. Silicone-free and compatible with any petroleum-derived lubricant.

500 ml

Protection range

GALVATECH COLD GALVANIZING SPRAY

Protects any non-coated metal part. Allows recovery of hot-dipped galvanized parts or recovery of parts after machining or welding.

Cold-galvanization product, with high-purity zinc. Provides long-lasting protection to all ferrous metal or metal alloy parts. Creates a uniform film layer, resistant to temperatures of up to 550°C with no damage. Coating can be welded (except with argon), after film is created (24h at 25°C). Provides galvanic protection against all forms of thermal or chemical corrosion.

500 ml

SONIFAT 2040 DW ANTI-MOISTURE PROTECTIVE AGENT

Protects from humidity and displaces water. Long-lasting protection. All industrial machinery / Agriculture / Public Works / Aeronautics / Leisure (Hunting, etc.)

Rust protection : highly adhesive on metal, ensures long-lasting protection for coated surfaces. Degreasing agent : eliminates grease residue and impurities, and leaves behind a protective film. Penetration agent : penetrates deep down to fight sub-layer corrosion and prevent the formation and development of pitting. Water repellent : has water-resistant properties. Repels water from contacts. Suitable for all applications (with no electrical voltage present) that need to be kept dry and protected. Guaranteed silicon-free.

400 ml

Automotive cosmetics range

DEGIVRE DEFROSTING AGENT

Eliminates frost on windshields and rearview mirrors. Eliminates frost from windshields, windows, headlights and rearview mirrors on cars and vehicles of all types. Also effective against frost in locks, hinges and door seals.

400 ml

RENOV PLASTIQUE WITH SILICON

Silicon polish. Restores the gloss and shine of new materials.

Restores brilliance and shine, just like new. Specially developed for dashboards, bumpers, rubber furnishings on doors, paints, varnishes, casings on motorcycles, scooters and jet skis, etc. Leaves behind a protective antistatic film to repel dirt and water. DOES NOT CONTAIN SILICON.

500 ml

NET PLASTIQUE POLISH

Silicon-free polish. A subtle aroma of oranges for a regular, easy maintenance. Leaves no traces or residues.

Restores brilliance and shine, just like new. Specially developed for dashboards, bumpers, rubber furnishings on doors, paints, varnishes, casings on motorcycles, scooters and jet skis, etc. Leaves behind a protective antistatic film to repel dirt and water.

500 ml

TISSU NET AUTOMOTIVE CLEANSING FOAM

Prevents dirt accumulation and revives upholstery materials. Quick-acting foam. Eliminates stains. Absorbs dirt. Treats fibers.

400 ml

NET VITRES SPRAY READY TO USE

Cleaner with a strong degreasing power. Quick drying without leaving any trace or glare. Make shine and restore brightness for any glazed surfaces (windows, mirrors, windscreen...).

1000 ml
