## WHO ARE WE?

1950

1970

1990

2000

## MORE THAN 70 YEARS OF PASSION AND STILL GOING STRONG !

The IGOL brand was created when fifteen heads of independent producers and distributors of lubricants across France joined forces. Since then, the company has grown steadily and is now one of the leading independent manufacturer of lubricants.

Our perennial priorities have been: quality, innovation and close working relationships - all with a view to fostering an effective partnership with every customer.

## A PARTNER FOR PERFORMANCE

IGOL has always been involved in motor sports, competing at the highest levels. Rallying and motorcycle racing are embedded in the brand's DNA. Competitive racing provides an ideal and challenging proving ground for innovative lubricants. IGOL is proud to support the performance and achievements of its partners, by enabling them to exceed their expectations.

## PACKAGING THAT MEETS YOUR NEEDS

## AN EXPORT DEDICATED TEAM

## IGOL INTENSIFIES ITS INTERNATIONAL PRESENCE !

For more than 70 years, IGOL has been designing, developing and manufacturing innovative, state-of-the-art products.

IGOL offers a wide range of lubricants for engines, transmissions and gearboxes, but also complementary products such as greases, coolants, aerosols, cleaning products and cosmetics for all sectors of activity (Automotive, Motorcycle, Agriculture, Industry...).

With a brand new plant based in the north of France, IGOL continues to invest in research and development and in its production facilities to offer you premium products and services.

## FRENCH KNOW-HOW

IGOL exports its French know-how to many countries.

IGOL and its dedicated Export team can help you to grow your business by benefiting from a strong brand with a presence in many international motorsports competitions, state-of-the-art products tailored to your needs and your market, tailor-made marketing tools and actions.

**DO YOU WANT TO BECOME  
A DISTRIBUTOR OF THE IGOL BRAND  
OR TO KNOW MORE ?**

## CLEANING, BRAKE FLUID, MAINTENANCE & ADBLUE

IGOL SPECIAL PRODUCTS	SPECIFICATIONS
<b>SUPERNET</b>	A powerful, water-based cleaner for cars, motorbikes, boats, jet-skis, etc. Rapidly eliminates soiling, greasy stains, earth, brake pad dust and residues, mosquitoes, etc. Does not attack plastics, paintwork, varnishes, chrome plating or aluminium alloys. Leaves a protective, anti-corrosion film. Free from phosphates, EDTA and NTA. Instructions for use: spray onto the surface to be cleaned and then wipe off using a clean cloth. Store protected from frost at a temperature of less than 40°C.
<b>PROBEOL ABSORBENT</b>	An absorbent and anti-skidding product for use in industrial premises and on roads. <ul style="list-style-type: none"> <li>- An absorbent based on wood particles derived from sustainable sources.</li> <li>- Internal quality control measures applied to manufacture and sale.</li> <li>- The main raw material was selected since it reduces the depletion of natural resources and the quantity of final waste.</li> </ul>
<b>SOAP AND ITS WALL MOUNT PLUS PUMP</b>	A solvent-free hand soap that generates a micro-brushing action to eliminate stubborn stains such as oil, grease, bitumen, ink, etc. The use of hypoallergenic compounds, gentle natural abrasives (based on maize) and natural oils that are kind to the skin means that your skin is not damaged by the product, even when used frequently.
<b>SUPER BLOCK FLUID</b>	An LHS synthetic brake fluid. It features outstanding stability, a particularly low freezing point, and has absolutely no effect on seals. It also has a very high boiling point. Suitable for antilock braking systems.
<b>BLOCK FLUID RUBAN BLEU</b>	An LHS-type synthetic brake fluid. Miscible with other products of the same type and compatible with metals and elastomers (seals). Polyglycol-based and hygroscopic, which means that it absorbs humidity from the air and as a result lowers the boiling point.
<b>OIL BLOCK +</b>	A mineral hydraulic fluid for Citroën hydraulic circuits whose components are painted green. Its very low pour point combines with its very high viscosity index to produce a fluid with outstanding thermal stability.
<b>MOTOR CLEAN</b>	A concentrated detergent, specifically formulated for washing and cleaning engines. For cleaning and overhauling engines. pH = 13.6
<b>TP NET</b>	A special detergent for heavy-duty cleaning of bodywork. A concentrated, self-activating detergent, formulated specifically for washing and cleaning vehicles driven in very dirty environments. Highly effective on the most stubborn soiling: diesel, oil, greasy sludges, insects, etc.
<b>NET CAR</b>	Bodywork detergent. A concentrated, self-activating detergent, formulated specifically for washing and cleaning vehicles driven in very dirty environments. Highly effective on the most stubborn soiling: diesel, oil, greasy sludges, insects, etc.
<b>MOUSSE LAVANDE</b>	Cleans all washable surfaces, even the most delicate ones (floors, kitchens, sinks & toilets, earthenware, wooden features, carpets). Dilute in water before use.
<b>ADBLUE®</b>	AdBlue® is a solution containing a 32.5% concentration of very high-purity urea. It is intended for vehicles fitted with SCR (Selective Catalytic Reduction) technology.

## AEROSOLS

### DEGREASING

#### NET CONTACT

##### DEGREASER FOR ELECTRICAL CONTACTS

**Residue-free. Very short drying time. Compatible with most materials.**

Degreases metal components, bearings, moulds, machined parts, etc. Cleans braking components (callipers/discs, etc.) – compatible with elastomers. Cleans the beds, frames and side-rails of machine-tools.

Degreases electric motors, disconnectors and switches (so long as the voltage applied is less than 12,000 V). Can be used on most materials, including coated metals, laminates and thermoset plastics. Inert with regard to metals and does not oxidise light alloys or copper-based alloys.

#### R44

##### UNIVERSAL DEGREASER

**A universal degreasing, cleaning and descaling agent. General and automotive engineering work.**

Cleans and degreases mechanical parts, brake pads and shoes, clutch mechanisms, ignition distributors and electrical terminals. Dissolves resinous deposits, oils, greases, waxes and brake fluids.

#### NET FREINS

##### DEGREASING PRODUCT

**Special product for brakes and clutches**

Removes brake fluids, greases, oils, dust and all residues from metal parts. Restores clutch disc lining adhesion to the flywheel. Ensures that the braking system operates correctly. Eliminates any noise. Does not leave any residue.

#### IGOSOLVE AL

##### DEGREASER FOR AGRO-BUSINESSES

**Colourless - Odourless**

Specially formulated for degreasing mechanical parts in the agri-business sector.

Conforms with the requirements stated in FDA 21 CFR 178.3530.

### MAINTENANCE

#### OIL CUT TP 150+

##### LUBRICANT FOR DRILLING AND TAPPING

**Simplifies drilling and tapping operations performed on all metals. Enhances the performance and service life of the tooling.**

Thanks to its impressive extreme-pressure properties, it can be used:

- On ferrous and non-ferrous metals
- For all difficult operations (drilling, tapping, threading, boring, reaming)
- For all types of activity.

#### DEGRIP AL

##### UNSEIZING AGENT FOR AGRO-BUSINESSES

**A high performance, multi-purpose unseizing agent**

Lubricates, unseizes and facilitates dismantling. High wettability and good ability to penetrate. Protects parts from corrosion. Specially formulated for use in the agri-business sector.

#### REDUCTOL 8

##### HIGH PERFORMANCE, MULTI-PURPOSE UNSEIZING AGENT

**Facilitates dismantling. Unseizes. Reduces rust. Lubricates. Inhibits corrosion. Repels moisture. Creates a phosphate coating.**

Reductol 8 is a multi-purpose unseizing agent. It reduces rust and removes scale from mechanical parts, thus facilitating their disassembly. Moreover, its formulation gives it exceptional descaling and cleaning properties - it is not so much a product as a maintenance assistant.

## MAINTENANCE (cont'd)

### THERMO CONTACT

#### ELECTRICALLY CONDUCTIVE, ANTI-SEIZING FITTING PASTE

##### Restores surfaces impaired by the presence of solid or film-forming residues

Inhibits corrosion and rust induced at high temperatures. Protects against seizing. Lubricates at high temperatures. This anti-seizing paste contains an aluminium complex soap and has been formulated to prevent seizing and inhibit corrosion. It facilitates the assembly and disassembly of parts exposed to adverse chemical and/or thermal effects. Thermo Contact improves the connection quality of electrical contacts. Lubrication from -30°C to +600°C.

### DÉGRIPPANT LUBRIFIANT

#### MULTI-PURPOSE PRODUCT

##### A high-performance unseizing agent, lubricant and corrosion inhibitor

Unseizes, lubricates and protects from corrosion all mechanisms and metal components. Repels water and moisture. Leaves a protective oily lubricating film which is highly effective against corrosion. Suitable for the long-term storage of metal parts. Reduces the coefficient of friction between moving parts and their supports. Dissolves greases and tars. This unseizing agent can be used in the following fields: manufacturing, construction, farming, etc.

### DKPAN

#### MULTI-PURPOSE PRODUCT

##### Restores surfaces impaired by the presence of solid or film-forming residues

A stripping agent that does not contain methylene chloride, N-methyl-pyrrolidone or methanol (which means it does not run). Effective on a wide range of paints and coatings. It strips varnishes and coating products, removes graffiti and dissolves most adhesives. Plastics processing: dissolves plastic residues that can make moulds unfit for use. Compatible with use on supports that are not attacked by solvents (wood, brick, concrete, iron and steel).

### SOUDNET

#### ANTI-ADHESIVE AGENT

##### Protects nozzles. Prevents the adhesion of weld spatter.

Silicone-free formulation. The protected parts can be painted after use. Used to protect parts near to the welding operation. Chemically and thermally stable.

### ANTI-CREVAISON

#### TYRE REINFLATOR

##### Repairs and reinflates tyres with an inner tube or without (tubeless)

Repairs and instantly reinflates tyres with inner tubes or tubeless tyres, without requiring any tyre removal or tools. Suitable for tyres fitted to cars, motorbikes, scooters, trailers, caravans, etc. Can be used to reinflate all types of automotive and motorbike tyre (two cans of product needed for 4x4 vehicles).

### DÉMARRAGE MOTEUR

#### SPECIAL DIFFICULT STARTING PRODUCT

##### Helps petrol and diesel engines start in all weather

Facilitates engine starting. Prevents all types of engine seizing risk: it works quickly to avoid draining the battery. Can be used on all types of engine.

### FILTER CROSS

#### PRODUCT FOR MOTOCROSS AIR FILTERS

##### Provides effective particulate retention, and protects the engine from abrasive wear

A highly-adhesive lubricant which is sprayed onto foam filtering elements.

## GREASING & LUBRICATION

### SILGLISS

#### SLIDING AGENT CONTAINING SILICONE

**Provides long-lasting lubrication. Seals surfaces, facilitates sliding.**

A clean, synthetic lubricant for all mechanisms. A sliding agent for industrial applications. Helps to release thermoplastics from their moulds. Lubrication of cutting tables and blades (printing). May be used to provide temporary protection since the product applies a rust-inhibiting film (e.g. to small metalloplastic parts).

### SILGLISS AL

#### SLIDING AGENT FOR AGRI-BUSINESSES

**Provides long-lasting lubrication. Seals surfaces, facilitates sliding.**

A clean synthetic lubricant for all mechanisms used in the agri-business sector. An anti-adhesive containing silicone. For all problematic greasing applications.

### GELFLON

#### WHITE GREASE CONTAINING PTFE

**For use in humid environments. With added PTFE.**

**Service temperature: -20° to +180°C**

A gel codex mineral oil formulated for use in humid environments. With added PTFE (polytetrafluoroethylene). Workshops, kitchens, bathrooms, plant rooms, etc. Recommended for plumbing, mechanical work, working on vehicles and cycles. Can be used wherever a non-soiling lubricant is required. May be removed by organic solvents.

### SHP 50+

#### MULTI-PURPOSE GREASE

**Exceptional resistance to water (for equipment operated in watery or muddy conditions, or exposed to adverse weather). For the general greasing of machine tools, ball bearings and roller bearings.**

High adhesion to metals (thereby extending the greasing intervals). Outstanding mechanical stability.

Remarkable shear strength. Completely insoluble in water (boiling water and steam) which makes it ideal for lubricating equipment operated in watery or muddy conditions, or exposed to adverse weather. Very good inhibition of corrosion and rust properties. Extreme-pressure properties. Service temperature: -20° to +140°C.

### PATE AS 450

#### LUBRICANT CONTAINING MOLYBDENUM DISULPHIDE MOS<sub>2</sub>

**Elevated pressures. High temperatures**

A synthetic lubricant with a high content of molybdenum disulphide (more than 50%). Resists high temperatures (up to +165°C for oily lubrication and +400°C for dry lubrication) and elevated pressures. Lubrication of guides, slides, gears, valves. Slewing without tearing. Lapping without scratching, seizing or galling. Deformation of metals. Treatment of cutting tools. Service temperature: -30°C to +400 °C.

### GREASE GRW

#### MULTI-PURPOSE GREASE POUR AGRI-BUSINESSES

**Strong adhesiveness. High loads. Completely insoluble in water and steam**

Ball or roller bearings and plain bearings subject to recurrent vibration and impacts. Joints and chains operating in very humid environments. Slides and cams. Open or enclosed gears. Mould ejection system. Strong adhesiveness to metal parts. High resistance under high loads. Completely insoluble in water and steam. Service temperature: -20° to +140°C. Good resistance to oxidation.

### VISCOCHAINE PRO

#### SMOOTH-FLOWING CHAIN OIL

**A viscous, very smooth-flowing synthetic product. Exceptional resistance to water.**

A highly adhesive, oily lubricant specially developed to lubricate chains of all types (conveyor belts, motorbikes, bicycles, etc.), as well as cables and open gears. Reduces friction, increases the service life of the chain and protects against rust. Resists water and reduces chain noise. Service temperature -20 to 145°C. This lubricant is free from silicone and from components incompatible with NSF H2 requirements.

## GREASING & LUBRICATION (cont'd)

### SUPER VOLCAN EP

#### ADHESIVE LUBRICANT FOR CABLES AND GEARS

**An adhesive, extreme-pressure lubricant. Recommended for the greasing of cables and open gears.**

A very adhesive lubricant for all types of greasing of open, outdoor mechanisms, etc.

### PROPULS VISCOCHAINE EVOLUTION

**Specially developed for the lubrication of all motorbike chains.**

An oily and adhering product specially developed to lubricate the chains of road or off-road motorbikes, with or without O-ring seals, under extreme conditions of use. Reduces friction, increases the lifespan of the chain, repels water and protects against rust. Contains a solvent that eliminates deposits and ensures correct penetration between the chain pins.

### VEGELUB

#### PLANT-BASED LUBRICANT FOR PRECISION GREASING

**Does not harm paintwork, drives off water and moisture due to its water-repellent action.**

A plant-based lubricant specially developed to lubricate small items of equipment and mechanical assemblies. Does not run, compatible with clean and precise working. No chlorine, silicone-free. Particularly recommended when ecological restrictions apply.

### CHAINE AL

#### LUBRICANT FOR CHAINS USED BY AGRI-BUSINESSES

**Prevents clogging and the build-up of deposits. Excellent shear resistance.**

Particularly well suited to the lubrication of chains and conveyors, ball and roller bearings, plain bearings and slide hooks used in the agri-business sector and notably in abattoirs, meat-processing plants, canneries, bakeries, etc.

### FLUOX HT

#### FLUORINATED LUBRICANT

**High performance  
High temperature**

Provides clean lubrication and high performance between -35°C and +270°C. Resistant to impacts and shearing, and to humid and saline atmospheres. Inert with respect to oxygen. Silicone-free. Insoluble in petroleum solvents. Long lasting lubrication.

### R CHAINE

#### SYNTHETIC LUBRICANT

**Provides long-lasting lubrication.**

**A clean lubricant.**

**Service temperature: -40° to +210°C.**

A synthetic fluid for chains and conveyors. Provides long-lasting lubrication for moving parts. Anti-wear and extreme-pressure properties. High thermal stability, does not leave any carbonisation residues. Silicone-free. Compatible with petroleum-derived lubricants.

## PROTECTION

### GALVATECH

#### COLD GALVANISING AGENT

**Protecting of all uncoated metal parts. Reworking of hot-galvanised parts. Reworking of parts after machining or welding.**

A cold galvanisation product rich in extremely pure zinc. Provides long-lasting protection for all ferrous or metal alloy components. Forms homogeneous films that can withstand temperatures of up to 550°C without deteriorating. Coated surface is weldable (except in argon) once the film has formed (24 hrs at 25°C). Provides galvanic protection against all forms of thermal or chemical corrosion.

### SONIFAT 2040 DW

#### PROTECTION AGAINST MOISTURE AGENT

**Protects against moisture, repels water. Long-lasting protection. All engineering sectors, Agriculture, Construction, Aeronautics, Leisure (hunting, etc.).**

Protection against rust: adheres very well to metal, provides durable protection for coated surfaces. Degreaser: eliminates traces of grease and impurities and applies a protective film. Penetrant: acts deep within the material to combat substrata corrosion and to prevent the formation and development of pitting. Moisture displacement: due to its water-repellent properties. It drives water out of contacts. Suitable for all applications (excluding live voltages) that need to stay dry and protected. Guaranteed silicone-free.

## AUTOMOTIVE COSMETIC PRODUCTS

### NET VITRES

#### READY-TO-USE SPRAY

##### **A cleaner with high degreasing power**

Dries rapidly without leaving smears, marks or reflections. Brings out the shine and restores the sparkle to all glass surfaces (windows, mirrors, windscreens, etc.).

### RENOV PLASTIQUE

#### WITH SILICONE

##### **Polish containing silicone. Brings out the shine and restores the sparkle.**

Brings out the shine and restores the sparkle. Particularly well-suited to dashboards, bumpers, rubber door seals, paintwork, varnish and fairings on motorbikes, scooters, jet skis, etc. Leaves an anti-static, anti-dust and hydrophobic (water repellent) protective film. Contains silicone, for a perfect shine.

### NET PLASTIQUE

#### POLISH

##### **Strong adhesiveness. High loads. Completely insoluble in water and steam.**

Silicone-free polish. With a subtle orange smell for regular and easy maintenance. Leaves no smears, marks nor residues. Brings out the shine and restores the sparkle. Particularly well-suited to dashboards, bumpers, rubber door seals, paintwork, varnish and fairings on motorbikes, scooters, jet skis, etc. Leaves an anti-static, anti-dust and water-repellent protective film.

### DEGIVRE

#### DE-ICING PRODUCT

##### **Clears ice from windscreens and wing mirrors**

De-ices windscreens, windows, headlights and wing mirrors on cars or other vehicles. Also effective on ice in locks, hinges, door seals, etc.

### TISSU NET

#### SELF-CLEANING FOAM

##### **Eliminates soiling. Revives fabrics.**

Active, fast-acting foam. Removes marks and stains. Absorbs dirt. Treats the fibres.

## HEAT TRANSFER

## AND COLD WEATHER PRODUCTS

IGOL SPECIAL PRODUCTS	SPECIFICATIONS
<b>TRANSMIX (-35°C)</b>	A ready-to-use, top-end, high-performance, versatile “new organic formula” coolant that is fully compatible with all coolants and antifreezes on the market. Complies with AFNOR standard NF-R-15601 (type 3 coolants), except for the reserve alkalinity.
<b>TRANSMIX M (-37°)</b>	A ready-to-use, high protection coolant.
<b>IGOL MIX</b>	A ready-to-use, really top-end, high-performance, versatile coolant that is fully compatible with all coolants and antifreezes on the market. For initial and long-lasting treatment (if used at follow-up coolant changes) of the cooling circuit, providing protection against corrosion and other attacks of surfaces. Protects the cylinder head and cylinder block from overheating, which destroys surfaces by corrosion, erosion and cavitation perforation. Combats foaming causing leaks via the radiator or tank cap pressure valves. Miscible with all coolants on the market, including type D fluids.
<b>TRANSFLUID P</b>	TRANSFLUID P is a ready-to-use, top-of-the-range, high-performance, long-lasting organic coolant for cooling circuits in Peugeot and Citroën vehicles.
<b>TRANSFLUID +</b>	A ready-to-use, top-of-the-range, high-performance, long-lasting organic coolant for vehicle cooling circuits.
<b>TRANSFLUID VW+</b>	A ready-to-use, long-lasting, top-of-the-range organic and silicate coolant for cooling circuits in VOLKSWAGEN group vehicles. Meets VOLKSWAGEN requirements: VW TL 774G (G12++); Mercedes Benz 325.5; Man 324 Typ Si-OAT. TRANSFLUID VW PLUS is miscible and compatible with coolants meeting VW specifications TL 774D(G12), TL 774F (G12+) and TL 774J (G13).
<b>TRANSFLUID G</b>	A ready-to-use, monoethylene glycol-based heat transfer fluid with corrosion inhibitor.
<b>ANTIGEL CONCENTRE</b>	A state-of-the-art, monoethylene glycol-based, automobile liquid antifreeze. It is organic and does not contain amines, nitrites, borax or phosphates. Its exceptional properties ensure that the engine is protected and cooled. AFNOR standard NF R15-601.
<b>ALIGEL 700</b>	A monopropylene glycol-based heat transfer fluid particularly tailored to central heating circuits with water circulation, and to systems with solar sensors. Provides excellent freezing protection, and enhanced protection against corrosion of the metals present in the various circuits; whether they are of old or recent design. This relatively harmless fluid prevents the risk of intoxication in case of accidental communication between the primary and secondary circuits. The inhibitors used in the formula ensure good compatibility with hard water, preventing the risks of precipitation and scaling.

## WINDSCREEN WASH

### LAVE-GLACE ÉTÉ

#### READY-TO-USE

- Powerful degreaser
- Methanol-free
- Removes mosquitoes
- Non-corrosive for seals and paintwork
- Extends the longevity of windscreen wiper blades

### LAVE-GLACE TOUTES SAISONS

#### PROTECTION DOWN TO -10°C

#### READY-TO-USE

- Powerful degreaser
- Methanol-free
- Non-corrosive for seals and paintwork
- Extends the longevity of windscreen wiper blades
- Scented formula

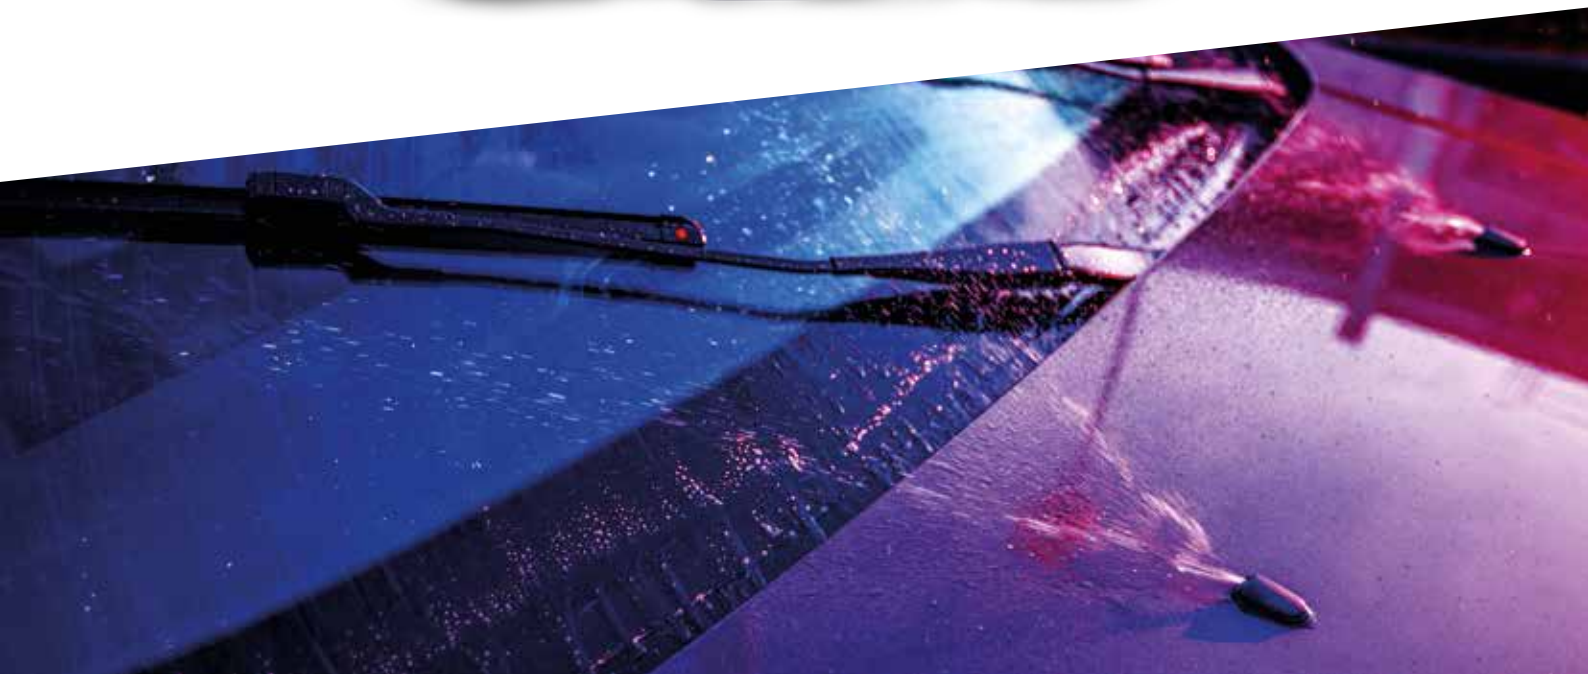

### LAVE-GLACE HIVER

#### PROTECTION DOWN TO -20°C

#### READY-TO-USE

- Powerful degreaser
- Methanol-free
- Removes mosquitoes
- Non-corrosive for seals and paintwork
- Extends the longevity of windscreen wiper blades
- Scented formula
