MORE THAN 70 YEARS OF PASSION AND STILL GOING STRONG !

The IGOL brand was created when fifteen heads of independent producers and distributors of lubricants across France joined forces. Since then, the company has grown steadily and is now one of the leading independent manufacturer of lubricants. Our perennial priorities have been: quality, innovation and close working relationships - all with a view to fostering an effective partnership with every customer.

Technology is also developing in the field of outdoor power tools and equipment, such as lawnmowers, chainsaws, hedge trimmers or other powered equipment. Whether you are a professional power tool user working in forests or gardens or a keen gardening enthusiast, this brochure will provide the information you need about the various products in the PROFIL range of IGOL lubricants dedicated to outdoor power tools and equipment.

FOR EVERY POWER TOOL YOU USE WE HAVE A SUITABLE LUBRICANT

As a leading independent player in the lubrication sector, IGOL is committed to adhering to good practices when developing and manufacturing its lubricants and ensures that they meet the most demanding international standards.

Are we "Eco-friendly"?

The biodegradability of the lubricants used has become one of the key factors to consider when using equipment in environmentally sensitive areas in terms of satisfying the applicable legislation. PROBEOL is IGOL's response to these concerns.
